PROFESSIONAL WORK

PROTOTYPE 10 CONCEPT
PROJECT BLACK S
QX INSPIRATION

I have been an automotive digital modeller at the Infiniti Design London studio since July 2016. I am part of the digital team which is responsible for 3D modelling, visualisation and virtual reality.

The following images are visualisation and digital modelling examples of my work at Infiniti on projects that have been released.

I have received all the necessary authorization to send this work from the Nissan/Infiniti brand.

DIGITAL MODELLING ALIAS AUTOSTUDIO

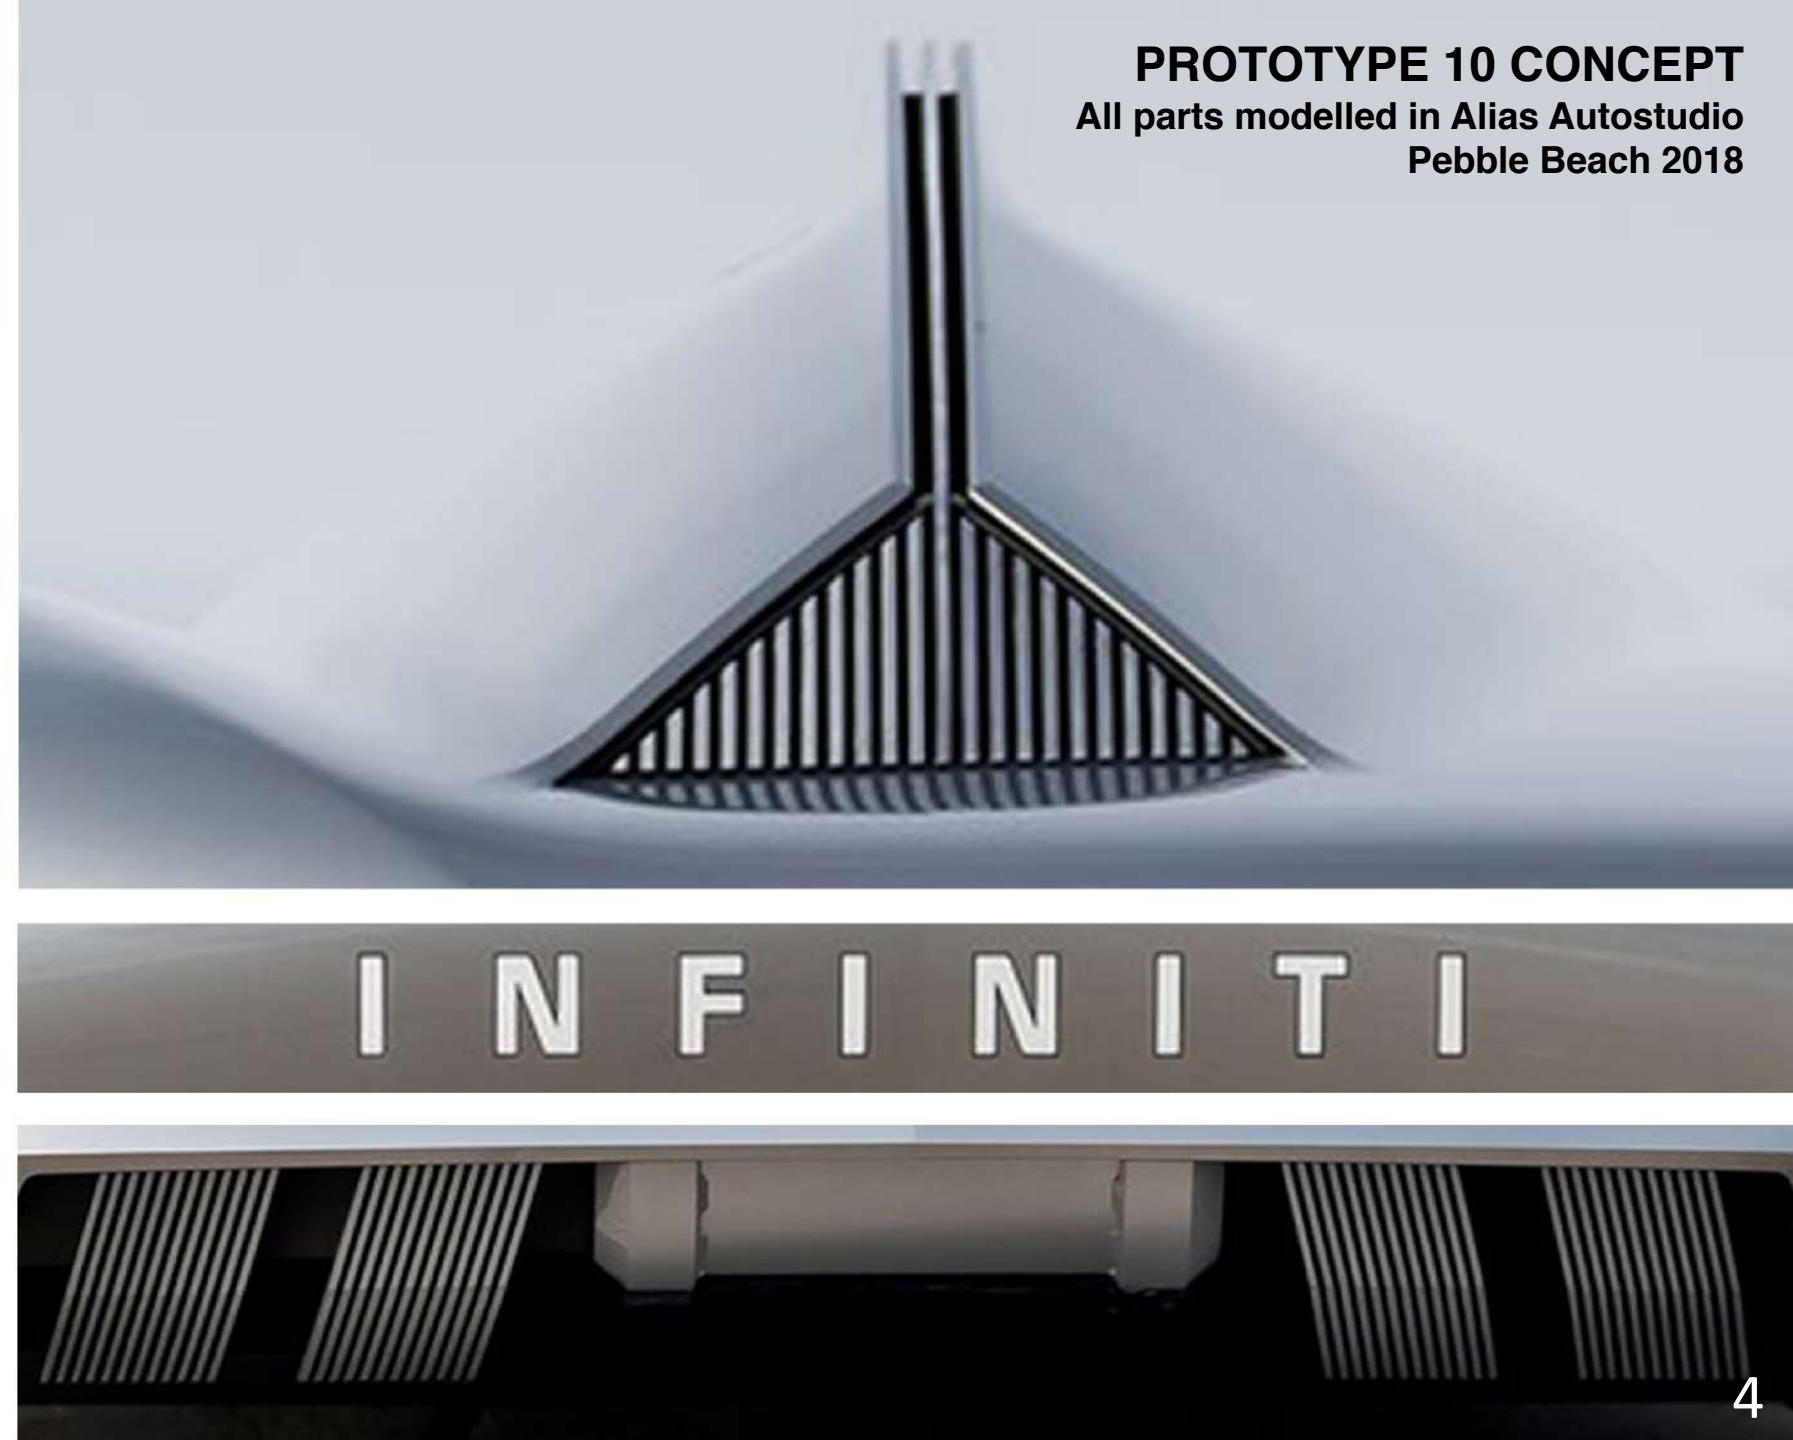

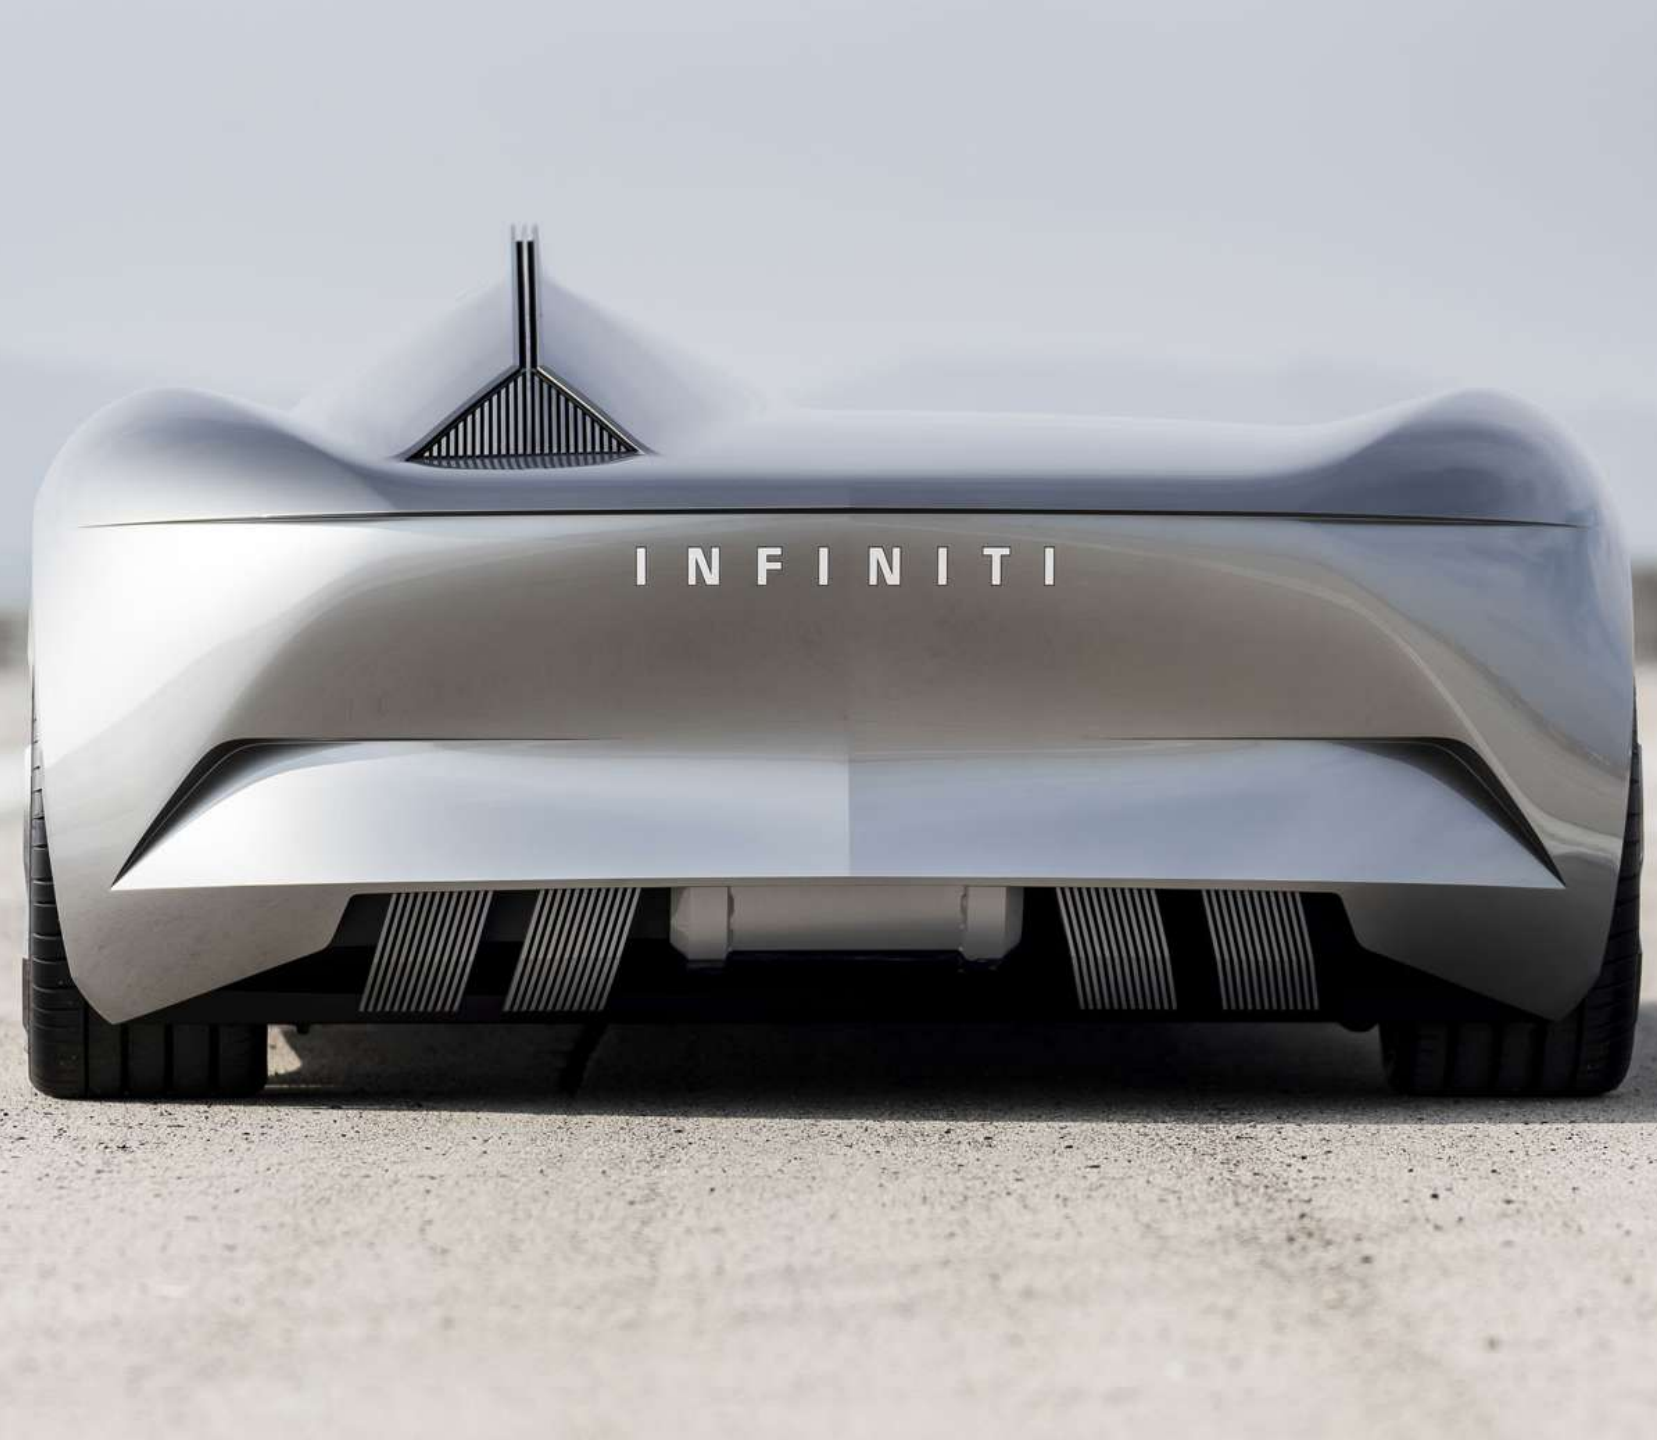

The following are photographs I found online that I am using to highlight the parts of the car I modelled digitally.

The 3D modelling software used is Alias AutoStudio.

**PROTOTYPE 10 CONCEPT
Pebble Beach 2018**

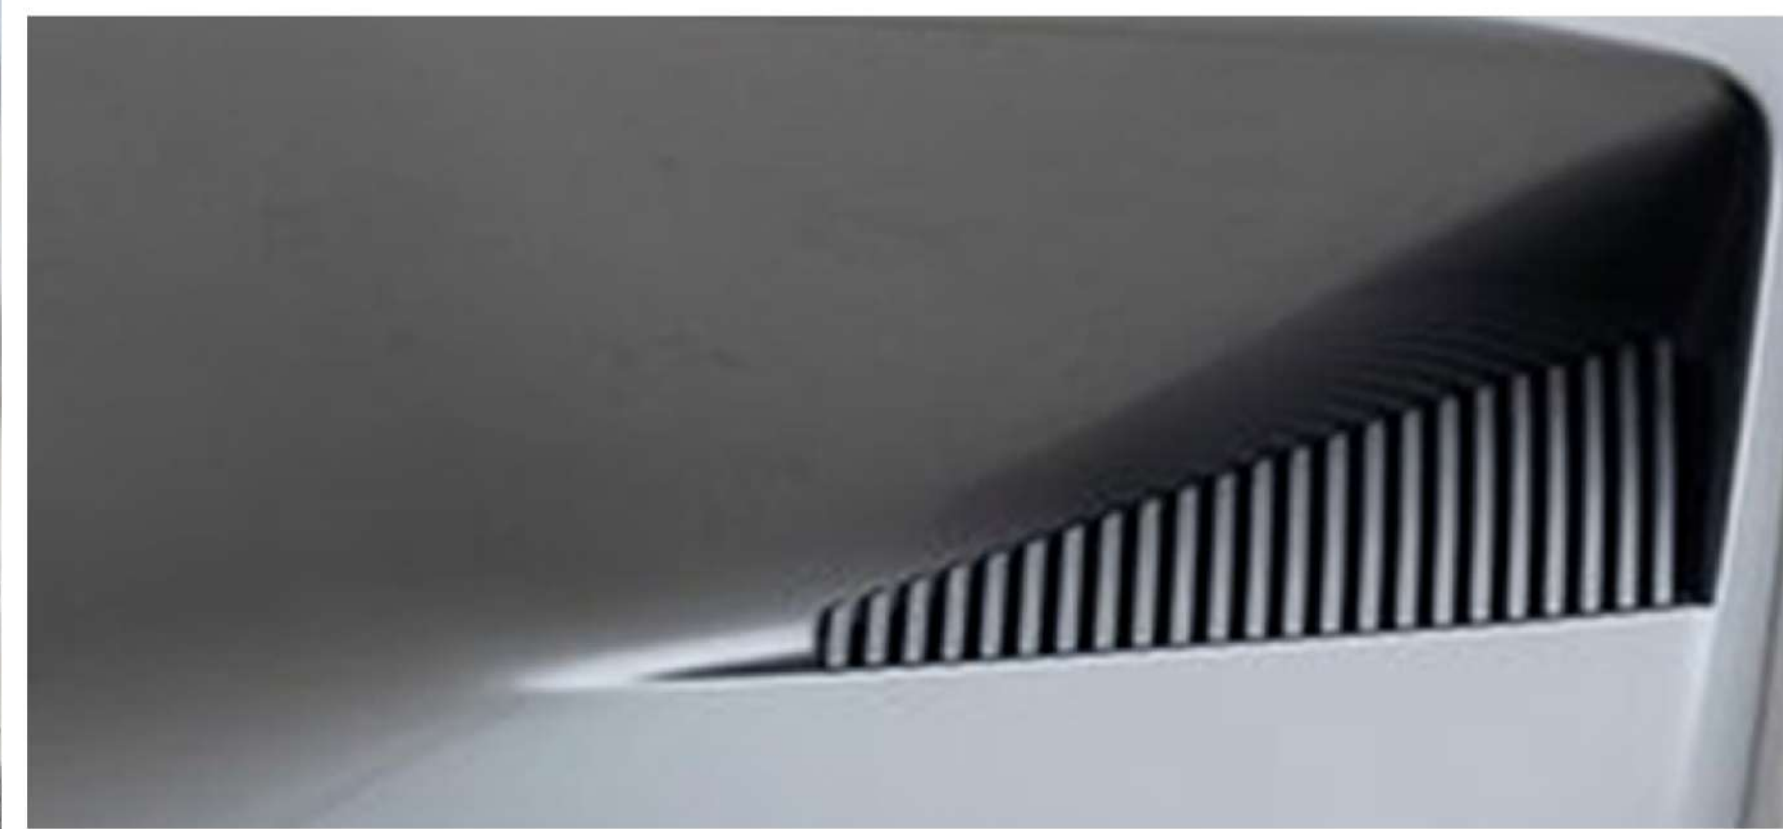

Parts I modelled: Front badge, headlamps, front diffuser, blade vents, rear diffuser, rear badge letters, rear top vents and volume, wheels, vents behind driver and side vents

VISUALISATION WORK VRED

The following images are non official design renderings I made during project development.

The visualisation software used is VRED.

PERSONAL PROJECTS

RENAULT TREZOR
LAND ROVER DEFENDER 90
FORD GT
LAMBORGHINI AVENTADOR
BMW i8
RANGE ROVER EVOQUE

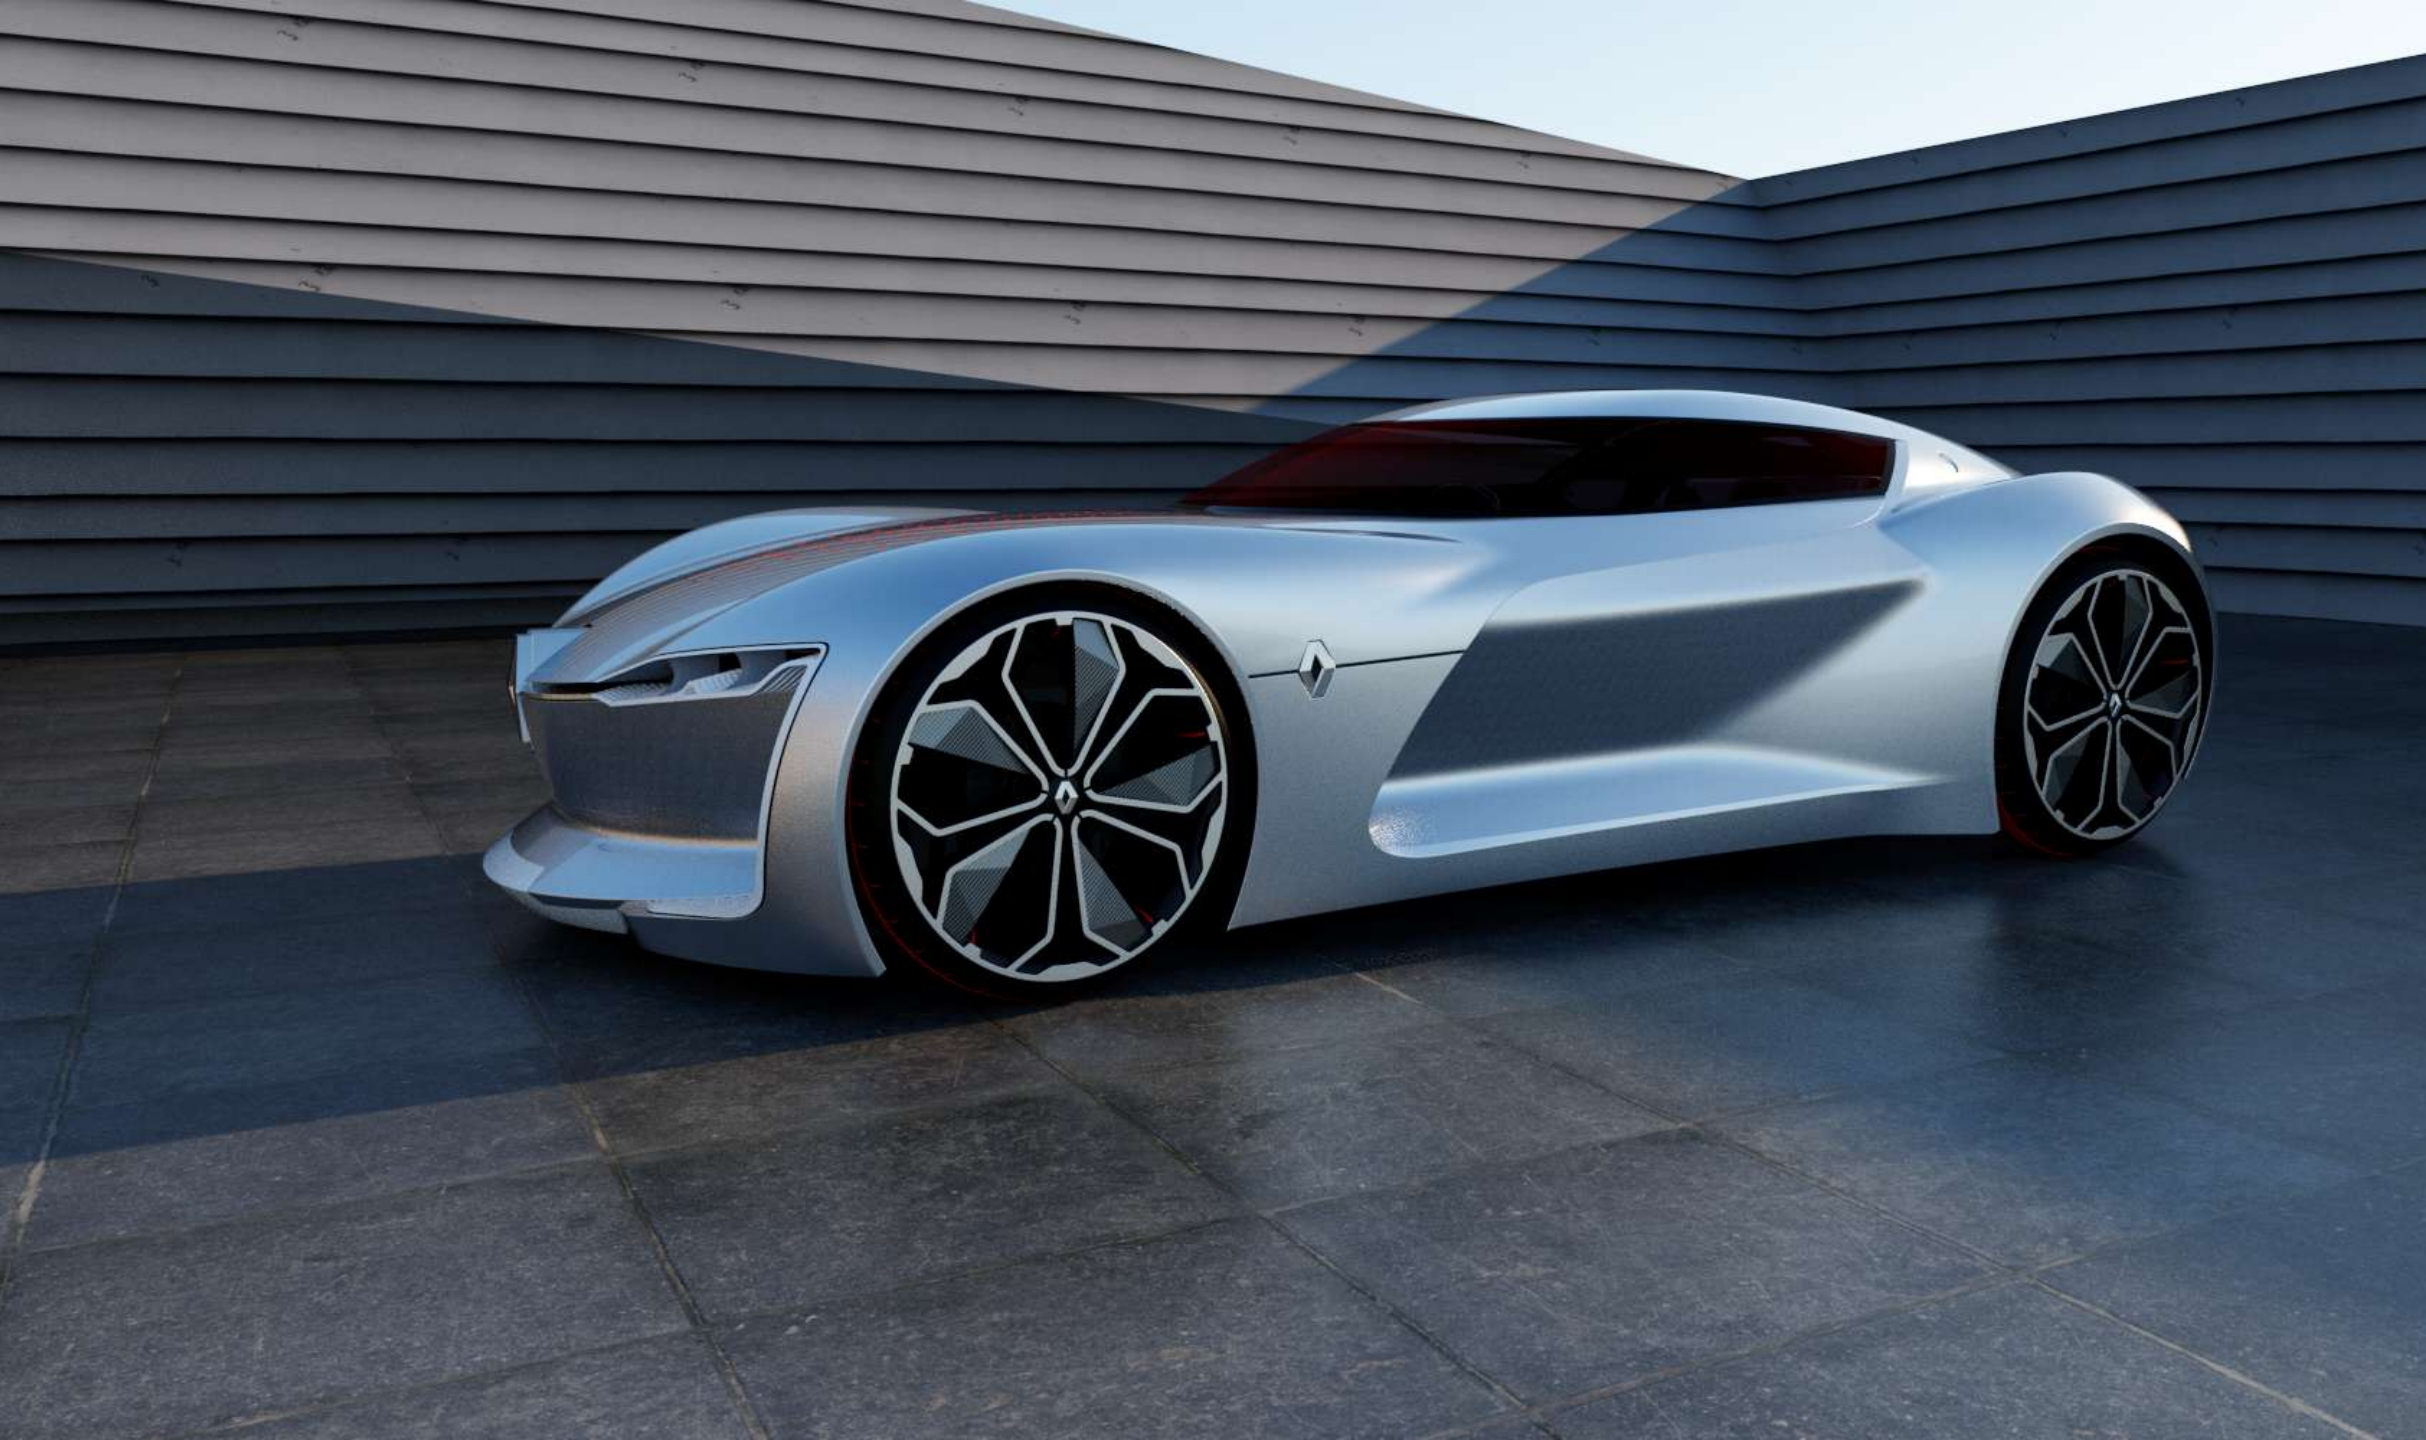

The following projects were made during my free time in order to further develop my digital modelling skills and rendering techniques.

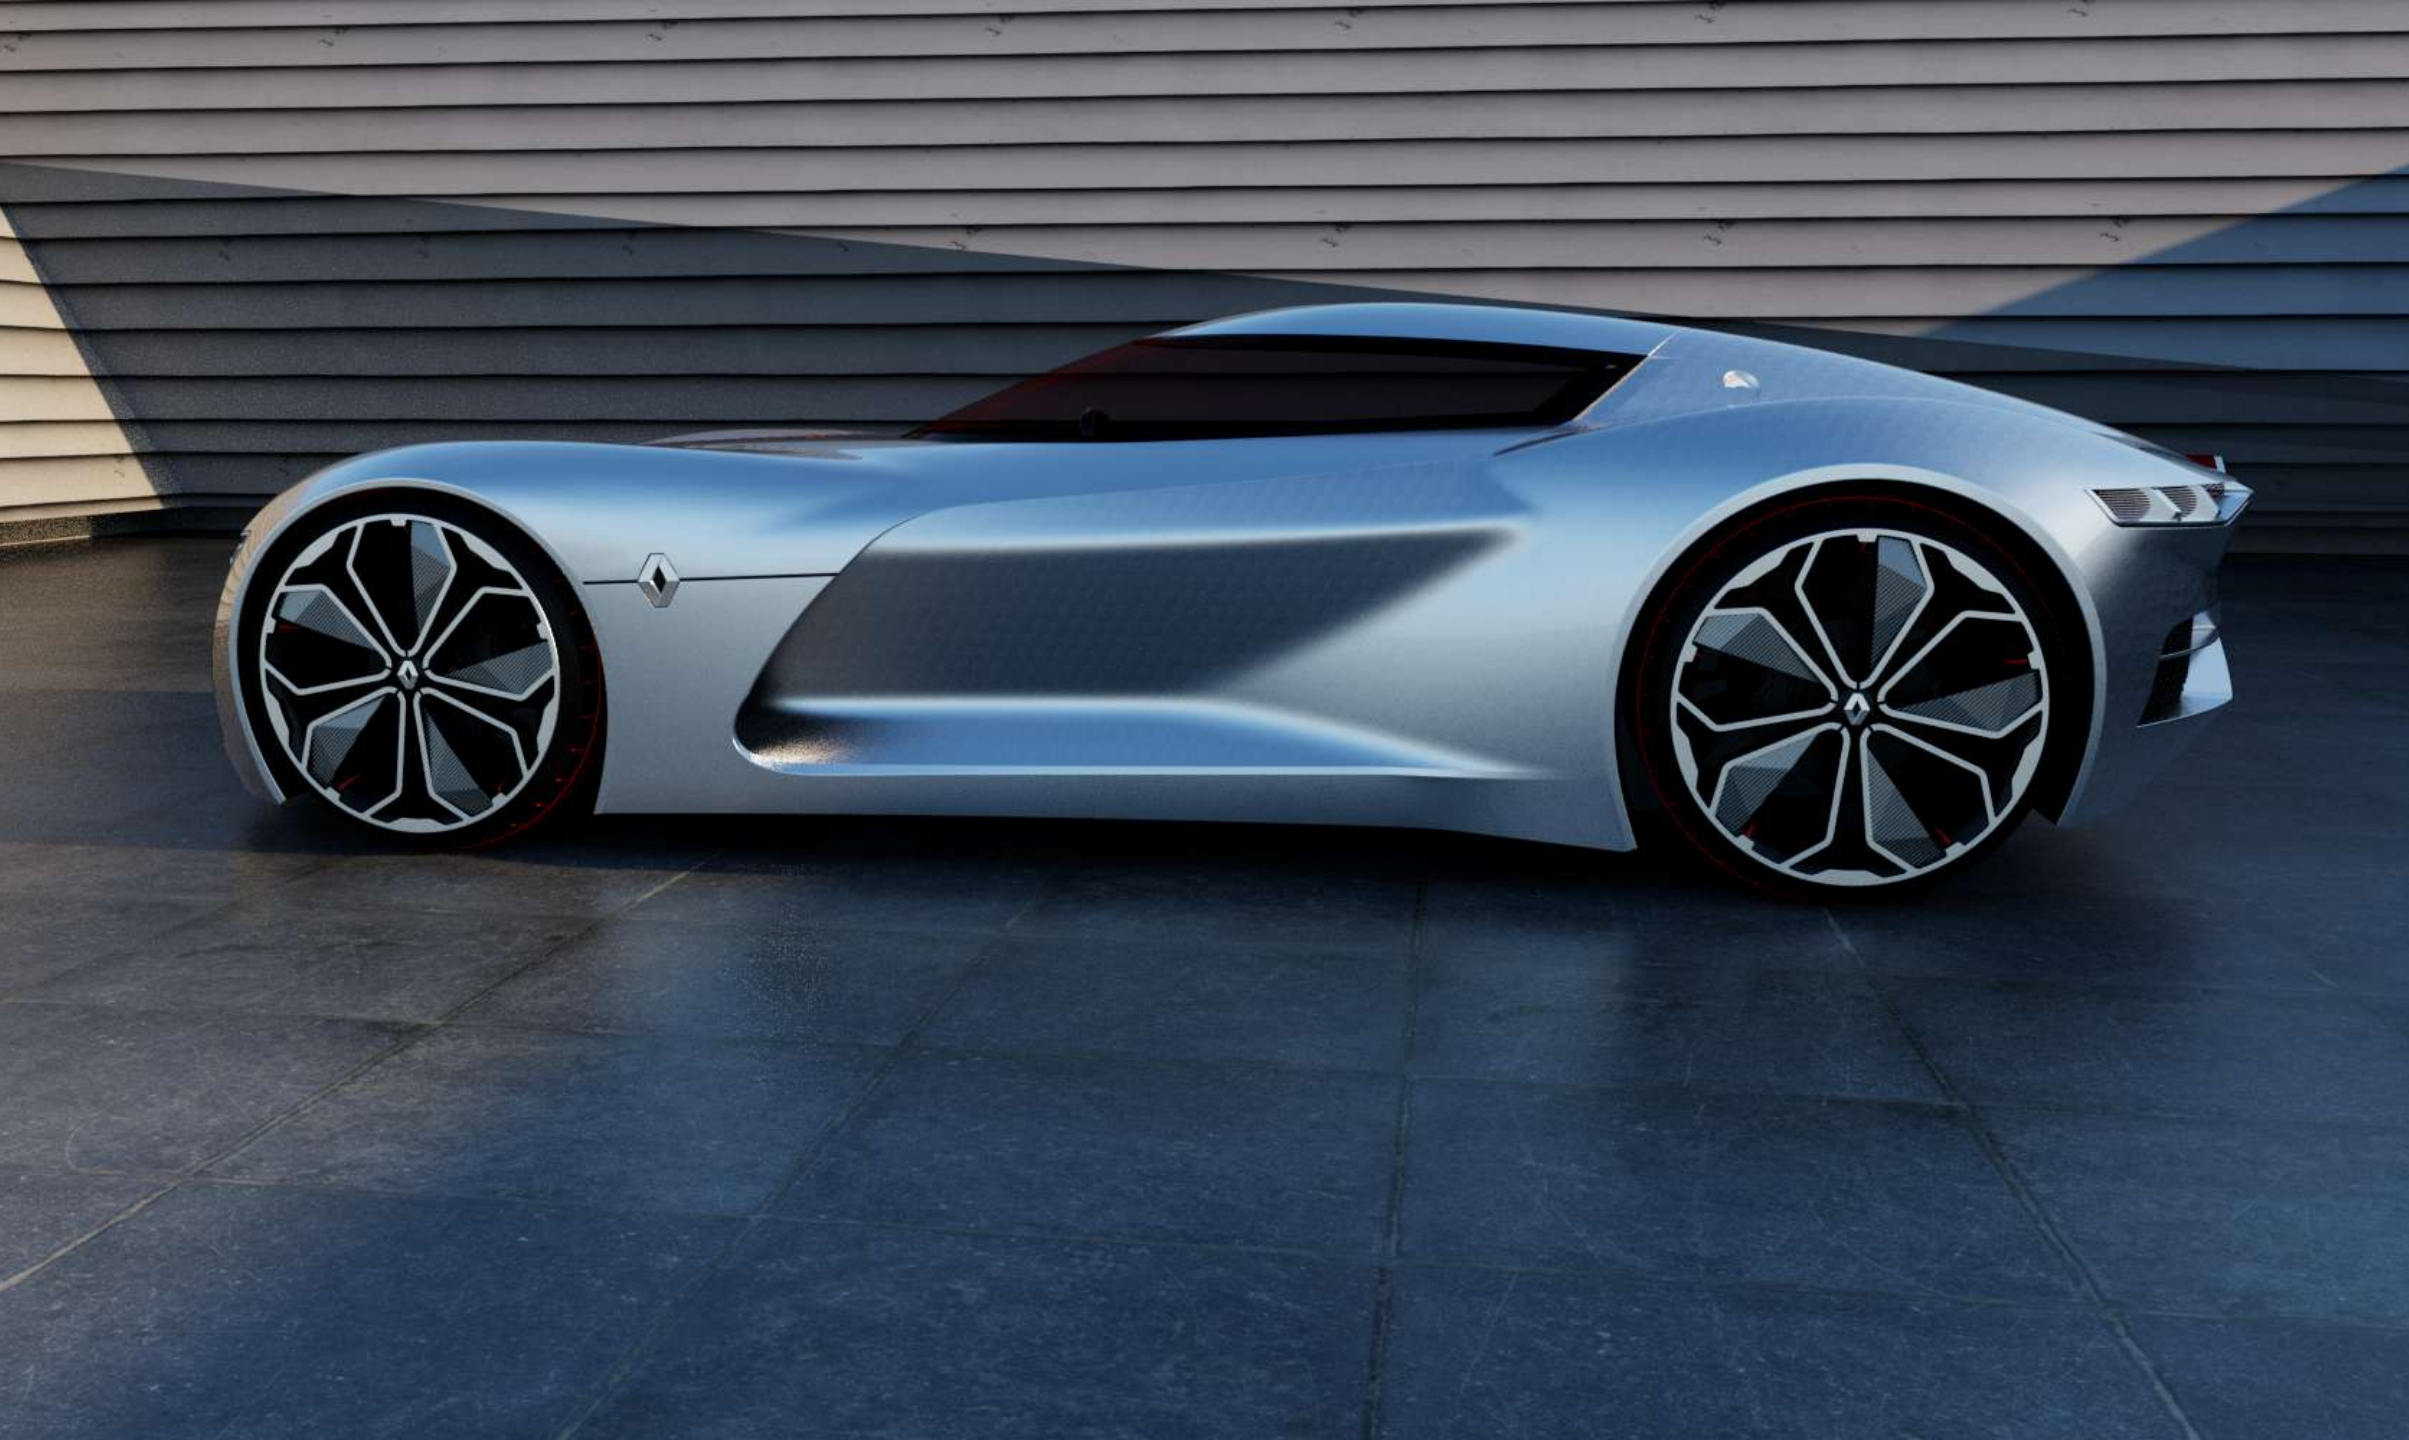

These are not team projects but personal work I did by myself from start to finish, the software used are Alias Autostudio, VRED and photoshop.

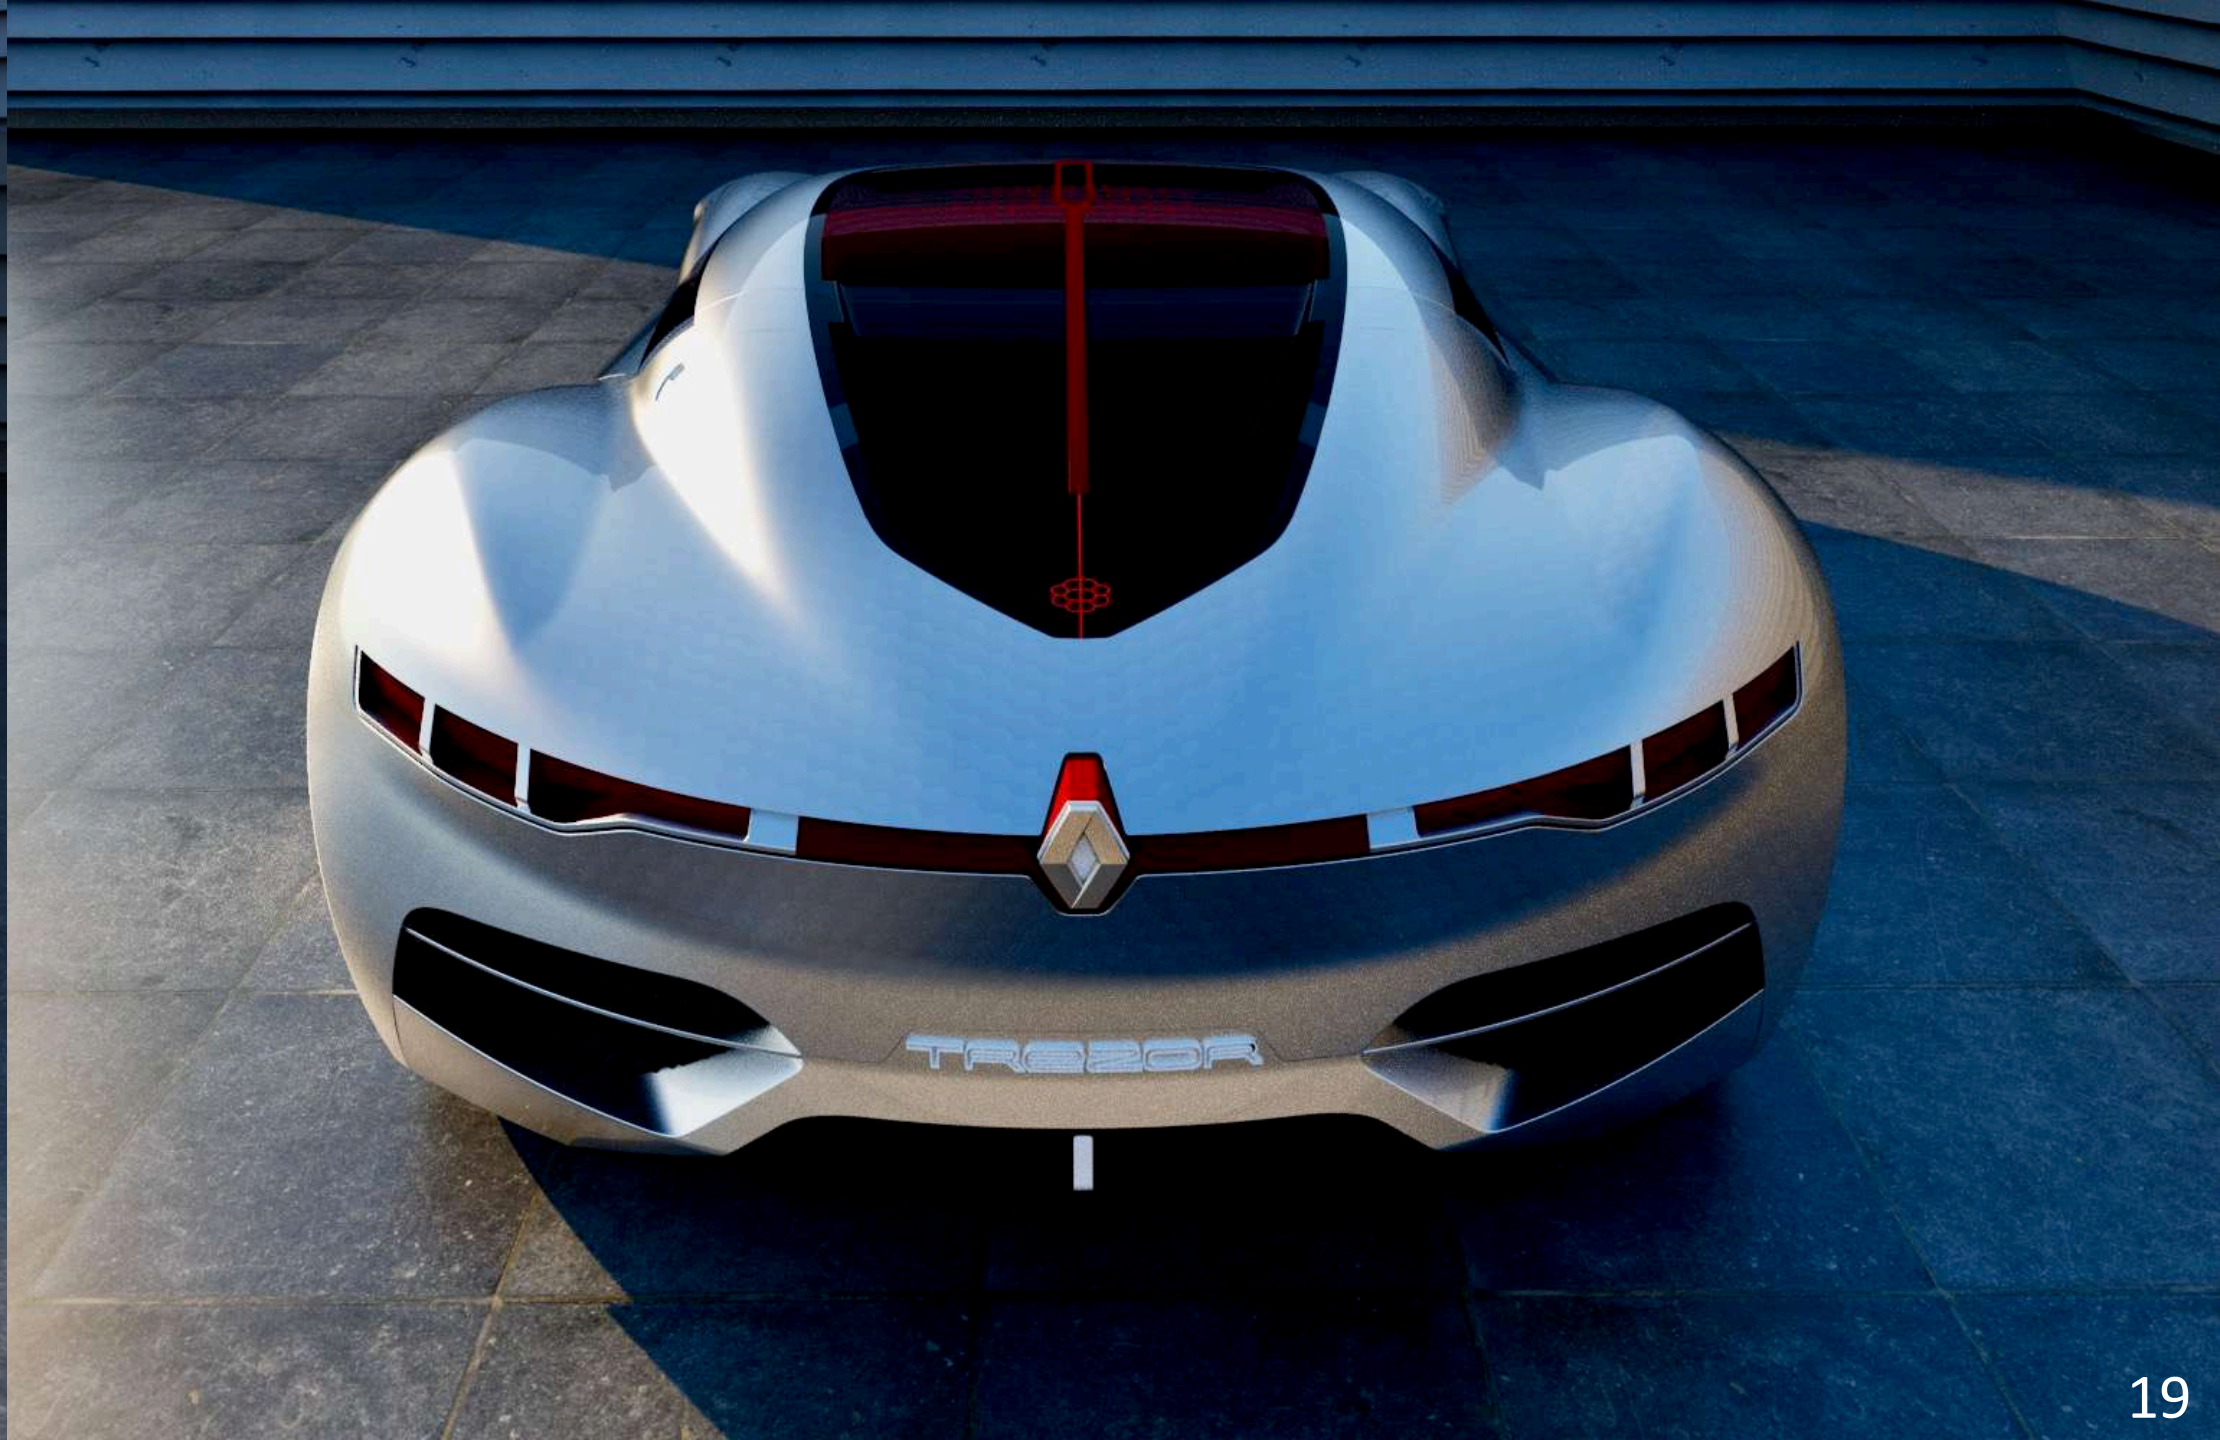

The projects are in chronological order starting with the most recent (2019) to the oldest (2016).

THANK YOU

Thank you for taking the time to review my work.

Please note that these projects are only a sample of my work, as a concept modeller I have worked on many unreleased projects that I cannot share.
